## leukocyte proliferation

leukocyte cell-cell adhesion regulation of T cell activation

regulation of immune effector process

response to lipopolysaccharide

response to molecule of bacterial origin

leukocyte migration

negative regulation of immune system process

positive regulation of defense response

positive regulation of cytokine production

regulation of leukocyte cell-cell adhesion

regulation of cell-cell adhesion

positive regulation of leukocyte activation positive regulation of cell activation

cytokine-mediated signaling pathway

regulation of inflammatory response

regulation of leukocyte proliferation

mononuclear cell proliferation
negative regulation of response to external stimulus

cell chemotaxis
